

1). In the past five years have you had to work a second job while working at the University? If yes, why?

He does not care about our economics. It is obvious by the way they worked the health care scam the U pulled. Jacking the rates through the roof and saying Oops. The U will find the money to do what they want to do, the rest of it is a list of excuses not to do something.

2). While working here have you needed to borrow money or use a credit card to make ends meet?

Pay freezes and NO step increases will cause this. They want to load on more work and keep the pay and employees down. Good people will continue to leave as they keep chipping away at the benefits, which by the way is why most of the people I know were here in the first place.

3). If you made a livable wage, what would you be able to do that you can't do now? (In 2003 the Jobs Now Coalition estimated that the hourly wage needed to meet monthly basic needs for a family consisting of one adult with 2 children was \$19.46)

The U does not care about livable wage, it is just a number that can be used in anyway any side wants to use it.

4). At your present salary, what do you go without?

Vacation, well I have the days, unless the U wants to take those away too but no money to go on one.
